This milestone focuses on validating the reliability, accuracy, and contextual awareness of PocketSmart AI's recommendation engine. The system is tested using real-world user scenarios across different planning categories—Home Interiors, Party Planning, and Jewelry Suggestions —to ensure consistent performance. Optimization efforts include refining AI prompt structures, improving session handling, and ensuring a smooth UI/UX across devices.

Activity 5.1: Test with Real-World Budget Inputs Across Domains Conduct end-to-end testing using varied budgets and user preferences for:

- Home decor setups from platforms like IKEA, Amazon
- Party packages including food (Swiggy/Zomato), venues (OYO), and decor
- Jewelry suggestions matched with outfit styles, occasions, and image inputs

- **Home Page**

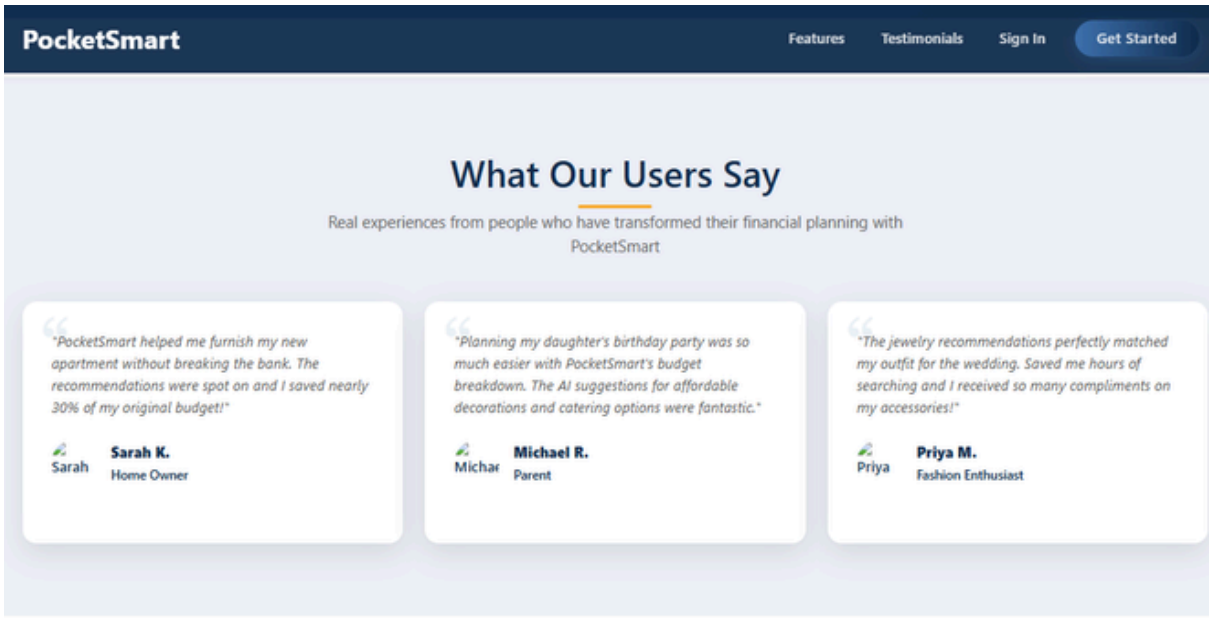

Home Page: The main landing page introducing PocketSmart AI’s features with links to planner modules and user actions.

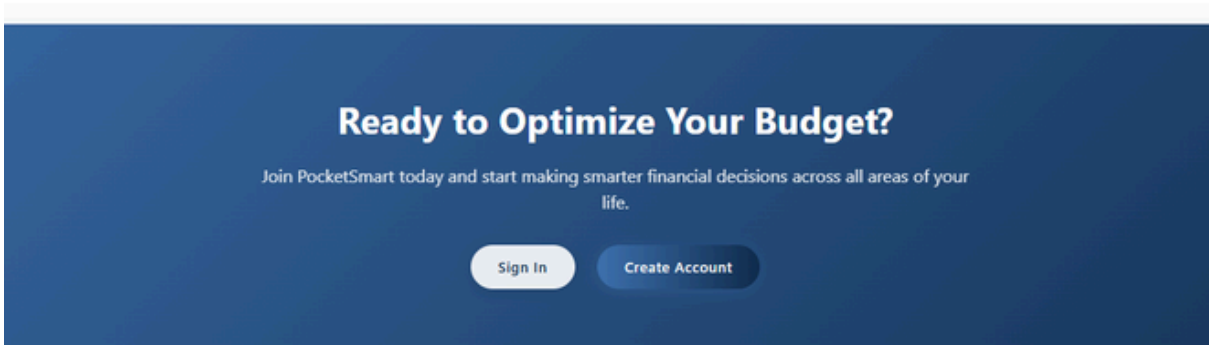

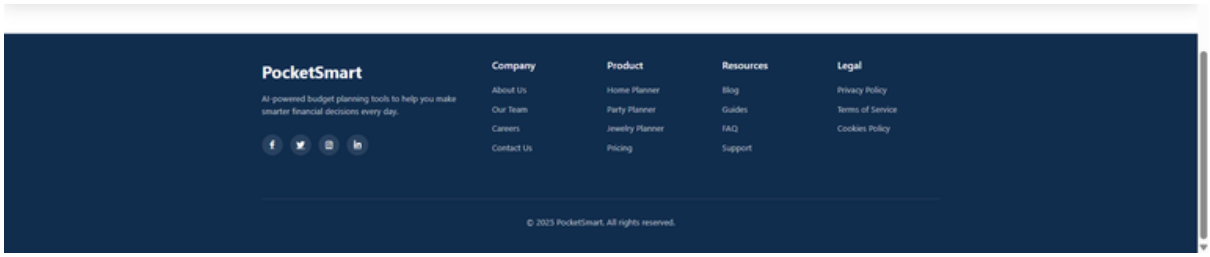

- **Testimonials Page**

Testimonials Page: Showcases real user reviews and success stories to demonstrate the platform's effectiveness.

- **Footer** Part

- **Register Page**

Register Page: Allows new users to create an account to access personalized budget recommendations.
